Comes with medical grade Chromotherapy as standard

Full Spectrum Heating

Superior output from the full spectrum, comprising of near, mid and far infrared

Reversible Ergonomic bench

Choose between a contoured or flat profile surface

Waterproof Outdoor Cover

Includes a complementary cover for protection against rain or snow

Features

True Wave II™ Full-spectrum Heaters

Exclusively utilising patent-pending True Wave™ far-infrared and True Wave II™ full spectrum heaters. An innovative fusion of both carbon and ceramic heaters in one, providing you optimal, efficient, and safe therapeutic heat.

True Wave™ Far-infrared Heaters

Our True Wave™ hybrid carbon and ceramic, low EMF and low ELF heaters surround you in therapeutic infrared heat.

360° Infrared Heat

Our saunas have heaters on the front wall, back wall, side walls and underneath the bench, heating your body from every direction, which targets your core, rather than just heating the sauna cabin air.

Chromotherapy Upgrade Included

Medical-grade Chromotherapy is included. Chromotherapy utilises coloured light wavelengths that therapeutically benefit mood, energy and cellular activity.

Ergonomically Designed

The chiropractor-designed backrest and reversible bench ensures ultimate comfort for long periods of relaxation. The seat is double-sided, with a contoured profile on one side, and flat on the reverse.

Built for the Outdoors

Featuring Gray Cedartec® exterior for outdoor use, insulated walls and Red Cedar interior for a premium sauna experience. The Outdoor sauna comes with a waterproof cover to maintain its warranty.

* For Residential customers only. Warranty on Commercial saunas are 5 years.

** Extra charges for very remote or difficult to access locations

Clearlight®

2 Person Clearlight® Sanctuary Outdoor Sauna | OD2

Specifications | OD2

Dimensions & Weight	INTERIOR		EXTERIOR		WEIGHT
	Width	130 cm	Width	144 cm	
Depth	117cm	Depth	131 cm		
Height	182 cm	Height	203 cm		
Bench	127 x 56 cm	Add 21cm for overhang			

Installation Requirements

Allow 50mm clearance at the rear and sides of your sauna.
Allow min 300mm above the roof of your sauna.

Ensure access to the powerpoint at all times, to allow for hard reset. We recommend installing the powerpoint at the roof level of your sauna.

Note: It is possible to install your sauna in smaller spaces, however this may impede access for repairs and maintenance. Your sauna warranty does not cover costs related to gaining access for repairs.

Heaters

True Wave™ Far Infrared and Full Spectrum Infrared Heater.

Power & Electrical Specs

230 V
2,400 W
11 A
The sauna requires a 16A CEE / Commando Outdoor socket installed on site.

Design

Eco Certified Grade "A" Hypoallergenic Western Red Cedar
Zero volatile organic compounds
6mm tempered safety glass door, window and ceiling
Double wall tongue and groove construction

Waterproof Rating

IPX 4

Warranty

Interior Components : Lifetime Warranty
Exterior Cabin : 5 Years
Clearlight® Water Resistant Sauna Cover : 5 Years

For the warranty to be valid, the following condition must be met:
Your Clearlight® Outdoor Sauna is protected at all times by a Clearlight® Water Resistant Sauna Cover.
If you choose to not use the provided Outdoor cover, your sauna must be housed under adequate shelter or in a weatherproof structure.

Recommendations for the Outdoor Sauna

Choosing The Right Location

The Outdoor Sauna is defined as “outdoor” because the walls are thermally insulated and therefore have thicker walls, for colder climates.

While the Sanctuary Outdoor saunas are designed to be placed outdoors, we highly recommend choosing a location without excessive exposure to rain, or that is prone to flooding. The Outdoor Saunas is splash resistant, but not weatherproof.

Please note: By International Standards, the Outdoor Sauna has an IPX WATERPROOF RATING of 4: “Protected from splashing water from any angle”.

Recommended Surfaces

The Sanctuary Outdoor Saunas must be installed on a firm surface that can support the weight, (with or without people in it).

A deck is the ideal surface, as the gaps between the decking slats allow for any moisture to escape, should any rain hit the surface of the deck.

Similarly, if placing the Outdoor Sauna onto a concrete slab, please make sure there is sufficient drainage to ensure any moisture drains away from under the floor.

DO NOT position the sauna directly onto grass or any other soft surface where the sauna can settle, and compromise the integrity of the structure.

Installation Requirements

For potential access to the electrics in the roof, allow a minimum 30cm above the roof, and 50cm clearance on each side of your sauna.

Ensure easy access to the powerpoint at all times, to allow for hard reset. We recommend installing the powerpoint at the back left of the sauna (when facing it).

Note: it is possible to install your sauna in smaller spaces, however this may impede access for repairs and maintenance. Your sauna warranty does not cover costs related to gaining access for repairs. Please consult the Clearlight team if you have any specific questions re space allowance.

Protection Of The Outdoor Sauna

A sauna cover will be provided free of charge upon every outdoor sauna purchase and the use of the sauna cover is mandatory for all the outdoor saunas to maintain the warranty. For the warranty to be valid, the following condition must be met:

Your Clearlight® Outdoor Sauna is protected at all times by a selected Clearlight® Water Resistant Sauna Cover.

If you choose to not use the provided Outdoor cover, your sauna must be housed under adequate shelter, or in a weatherproof structure.

Drainage Requirements

The sauna must not be placed on any surface that allows for moisture to collect underneath. Select a surface that allows water to drain away to avoid moisture building up and “wicking” up into the sauna from underneath the flooring.

The Outdoor Sauna Roof

The roof cap system is designed to allow water to run off the back of the roof. If the roof is not placed correctly or the base is not level, the water will pool on the roof and may cause damage to the sauna.

The Anchoring Kit

Your sauna comes with an anchoring kit that gives added protection for the sauna roof in extremely windy weather conditions.

Your Safety Matters To Us

The 2-person Outdoor Sauna has a combined weight of 350kg. Therefore, as a safety precaution, 3-4 persons may be required for lifting, holding and general installation.
